Presentation by Finance Director Robert Samario

The committee discussed and will recommend to the City Council at a future meeting the establishment of policies for all residential premises that have any kind of development (habitable or otherwise), structure(s), or any other kind of improvement that would be billed for solid waste services each year. Vacant residential premises without any development, structure(s) or any improvement would not be billed for solid waste services. Residential premises that are set to not be billed for solid waste services could opt into solid waste services for activity on the vacant Residential Premises. In order to opt in, the owner (or authorized representative) must submit a request in writing to the City that acknowledges that the Residential Premises will be assessed at the same rate as every other Residential Premises in the City that is billed for solid waste services.
